

What is Silexin?

SILEXIN is a daily multi vitamin-mineral supplement with key antioxidants specifically formulated for prostate health. SILEXIN is recommended by Urologists throughout North America as a **proactive approach to long-term prostate health care**.

SILEXIN contains the **5 key ingredients** for effective support of prostate health: **Lycopene, Vitamin D3, Selenium, Decaffeinated Green Tea Leaf Extract, and Vitamin E**. The dosages of the key ingredients found in **SILEXIN** carefully match the doses studied in various key scientific research and clinical trials in North America and Europe, which found significant improvement of overall prostate health.

Who Can Benefit From SILEXIN?

All adult males (with or without prostate concerns) can benefit from the ingredients in **SILEXIN**. Studies have found that risk factors such as age, race, family history and dietary factors are associated with prostate problems. Among all leading health issues for men, two out of six involve the prostate.

Many scientific research and clinical trials conducted in Europe and North America have confirmed the effectiveness of the ingredients in SILEXIN for significant improvement of prostate health. The beneficial effects of Lycopene, found in tomatoes and Green Tea Leaf Extracts have caused the medical and biochemical community to focus a great deal of attention on diets and dietary supplements containing these two ingredients and consequently research activities have increased dramatically over the last few years.

Be proactive about your prostate health today with SILEXIN.

Label Accuracy and Quality

BioAdvantex is pleased to note that a study conducted by Uro-Oncologists at the Toronto Sunnybrook Regional Cancer Centre on commonly used nutritional supplements for prostate health shows that **ProVantex products ranked first in label accuracy** among the products tested. (Journal of Urology, July 2002)

Dosage and Ingredients

SILEXIN is convenient. To obtain the ingredients contained in **SILEXIN**, the consumer would

have to purchase several different products and take up to twelve pills every day. **SILEXIN** is properly encapsulated in one convenient twice-daily formulation, to ensure maximum absorption, and enhanced effect.
